

SolidSoft

Shower tray

A UNIQUE
SENSATION
UNDER
YOUR FEET

PERFECT FIT

It is a real luxury to feel that sensation under your feet after a hard day at work. SolidSoft features a relaxing effect, as you feel it adapt to the pressure of your steps on its warm and soft surface. Drops fall on Solid Soft with a muffled sound that provides the perfect musical touch to that relaxing, comfortable atmosphere you so much needed.

SolidSoft

¿WHAT IS **SOLID SOFT?**

SolidSoft is a new concept, a latest-gen material patented and developed in collaboration with Bayer Material Science. SolidSoft trays have a texture that is surprisingly smooth to the touch, its essential quality revealed when stepping on it for the first time with bare feet: a true pleasure, the closest thing to walking by the sea on wet sand.

SolidSoft

UV resistant

Drain adaptable

Thickness 3 cm

A 10-year guarantee

SolidSoft adapts to pressure

Because it is flexible, SolidSoft adapts to the pressure of your steps on its surface. It has a cushioning effect, protecting the joints and making it particularly recommended for people with reduced mobility.

SolidSoft is warm and silent

No more cold feet! SolidSoft has an incredibly warm and soft feel to it. SolidSoft is also silent: its surface muffles the sound of the water falling on it.

SolidSoft is easy to transport

SolidSoft comes in a manageable box, allowing it to be loaded, transported and handled by just one person in a simple and convenient way.

SolidSoft is easy to install

It is easily installed, in a clean and simple way, saving time and money. SolidSoft is compatible with every type of shower screen. See installation at: www.solidsoft-tray.com

MEASUREMENTS

Value of distance C:

38 cm for trays with a width of 70 and 90 cm
43 cm for trays with a width of 80 and 100 cm
Square shower trays with center drain location

Special cuts are no problem

You can ask for special cuts to accommodate columns or corners.

SolidSoft

Certified by:

PROPERTIES OF THE MATERIAL

NON-SLIP:

SolidSoft has an excellent non-slip capacity, as it is CLASS-2 certified, in accordance with regulation UNE EN 12633, which guarantees total safety when showering.

ANTIBACTERIAL:

The closed molecular structure of SolidSoft prevents the generation and proliferation of germs, and makes it very long-lasting. It has passed the tests required by the ISO 22196:2011 and ISO 846:1997 standards.

UV-RESISTANT:

SolidSoft is highly resistant to light and the passage of time. Test carried out in accordance with the UNE EN 263 standard.

RESISTANCE TO DOMESTIC CHEMICAL AND CLEANING AGENTS:

SolidSoft has surpassed chemical agent and stain resistance test in accordance with UNE EN 14527, classified as compatible with the use of standard products for the bathroom.

SolidSoft is a shower tray that is unique in the world, a product patented by Solid Soft Tray (Pat. N° PCT/ES2013/070056), made out of low-density polyurethane subjected to a high-pressure process. This process furnishes it with an extremely water-resistant external layer, with excellent non-skid properties. The surface features a textured, natural slate finish.

SolidSoft has passed all the laboratory tests stipulated by the UNE EN 14527 standard, the results having been certified by AIDIMA.

WEIGHTS

The 70x140 cm shower tray weighs approximately 6.5 kg; a larger tray, of 100x206 cm, weighs approximately 15 kg.
